EDUCATION

Bachelor of Technology (B.Tech) - Computer Science Engineering

Graduation: June 2027

Dronacharya Group of Institutions, Greater Noida, India

CGPA: 8.0 / 10

Relevant Coursework: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks (TCP/IP), Object-Oriented Programming (OOP)

INTERNSHIP

Software Development Intern, SoftPro

September 2025 (1 Month)

- Implemented and optimized core data structures in C++ including linked lists, trees, hash maps, and graph algorithms to improve code efficiency.
- Debugged and refactored existing codebase in an agile environment, resolving 15+ issues and participating in code reviews using Git.

TECHNICAL SKILLS

Languages: C++20, Go, Java, JavaScript (ES6+), Dart, Python, SQL, HTML5, CSS3

Frontend: React.js, Flutter, Tailwind CSS, Bootstrap, Responsive Design, State Management

Backend: Node.js, Express.js, Fastify, Flask, RESTful APIs, Redis, MySQL, PostgreSQL

Tools & DevOps: Git, GitHub, Docker, Postman, Linux (Bash), GCC/G++, Vercel/Render, CI/CD

Concepts: System Design, Distributed Systems, REST API Design, OOP, Multithreading, Concurrency

PROJECTS

Online C++ Compiler

React, Express.js, Node.js, Deployed on Render

- Engineered a full-stack online C++ compiler with a React frontend and Express.js backend supporting real-time code editing, compilation, and execution with sub-second latency.
- Implemented a sandboxed code execution pipeline to securely compile user-submitted C++ code and return stdout/stderr with proper error handling.

ApolloGateway - Asynchronous Reverse Proxy

C++20, epoll, React, Redis

- Designed a high-performance Layer-7 reverse proxy using asynchronous, edge-triggered epoll event loops handling 10K+ concurrent connections per thread with minimal overhead.
- Built consistent-hashing load balancing, circuit-breaker patterns, and Redis-based rate limiting to protect downstream microservices from cascading failures.

TaskFlow - Cross-Platform Task & Schedule App

Flutter, Dart, Riverpod, Hive

- Developed a cross-platform task management app with a custom OLED-optimized UI, achieving smooth 60fps rendering on both iOS and Android.
- Architected unidirectional state management with Riverpod and integrated Hive local NoSQL for offline-first data persistence and seamless sync.

ACHIEVEMENTS & EXTRACURRICULAR ACTIVITIES

- Solved 500+ DSA problems across LeetCode, GeeksforGeeks, and CodeChef, consistently ranking in the top tier of weekly contests.
- Contributed bug fixes and performance patches to open-source distributed-systems utilities and C++ networking libraries.
- Selected as a Peer Mentor for Data Structures & Algorithms and Object-Oriented Programming, guiding 10+ juniors through debugging and core concepts.
- Participated in the Axios Smart City Hackathon, designing low-overhead APIs and socket metrics modules under tight deadlines.
